

# *NOAA Weather Radio*

A service of the National Weather Service

## *How Can You Get Tsunami Warning Messages?*

- ❖ Transmits Tsunami Watch and Warning Messages directly to you
- ❖ Use a Weather Radio with the Warning Alarm Feature, to instantly receive Tsunami Watch and Warning Messages, providing you immediate notification
- ❖ The Warning Alarm sounds an Alarm, much like a smoke detector, alerting you to the Warning Message
- ❖ NOAA Weather Radio is also a part of the Emergency Alert System (EAS), connecting to broadcasters and local emergency management officials
- ❖ NOAA Weather Radio is an “all-hazards” warning system, including flood, weather, and tsunami warning messages, as well as volcano, post-earthquake, and hazardous releases from local emergency management officials
- ❖ NOAA weather Radio is Alaska’s “all-hazards” warning system. Weather radios are becoming as common as smoke detectors in homes, businesses, schools, and places where people gather
- ❖ NOAA Weather Radio also provides the latest weather forecasts (on land and at sea) and current conditions, 24-hours a day
- ❖ Weather Radios are available at most radio and marine electronic outlets, and on the Internet
- ❖ Many public facilities along the Alaska coast, for example, Seward – a TsunamiReady community
- ❖ For more information about NOAA Weather Radio, contact the National Weather Service in Anchorage 907-266-5117 (business hours) or visit these web sites:
